November 9, 2011

Dear Chicago Section IFT Suppliers' Night Visitors:

Welcome to Chicago and the 2011 Chicago Section IFT Suppliers' Night!

Once again the Chicago Section IFT Suppliers Night is being held at the Donald Stephens Convention Center on November 9, 2011. This is our 48th Annual Suppliers' Night and our 26th year at the Donald Steven Convention Center in Rosemont, IL. Since our inception we have grown from 11 tables in 1963 with 11 index cards and one accounting worksheet to over 500 exhibits in 2011. Overall attendance for 2011 is expected to exceed 3,000 Food Industry Professionals!

We will again have The Suppliers' Night "Innovation Now! Forum" now in its fourth year. There will be three rooms in which exhibitors, companies, and individuals can present their new products, technologies, laboratory, and production facilities in a focused manner to a large audience of industry professionals and key decision shapers. There will be three one hour sessions for 8:30 AM to 11:45 AM. Every slot has been filled and we are looking forward to an enthusiastic response.

The Exposition portion of the show will begin at 12:00 Noon and go to 5:30 PM. There will be a Social Hour again this year from 5:30 to 6:30 PM. We will be offering food and beverages as well as the opportunity to relax in convenient areas for meeting and socializing.

I want to thank all of the Exhibitors and Sponsors who have been so generous in helping the Chicago Section IFT present Suppliers' Night each year. In addition, I want to thank all of the volunteers who have worked so hard on your behalf to make this show the best that it can be.

Now, Go Enjoy the Show!

Sincerely,

James N. Anderson
Chairman - Chicago Section IFT Suppliers' Night
Caravan Ingredients a CSM company

Long-time supporters of the IFT...

Published twice per month, **Food Business News** is a "Must Read" for the food industry. Get important information on ingredient markets, new products, marketing trends, consumer trends, government regulations, company news and industry news features.

Sosland is the exclusive publisher for **Culinology**[®], the magazine that blends the culinary arts, food science and food technology. Published four times a year, Culinology[®] Magazine is the publication of the Research Chefs Association and is published under the rights granted by the RCA.

Baking & Snack specializes in in-depth, actionable information that helps bakeries and snack food manufacturers run their plants more efficiently and their companies more effectively. It offers news, company and plant reports; ingredient and technical features; processing and engineering articles; new products showcase; industry trends, statistics and data.

You'll benefit from the wealth of information **Milling & Baking News** puts in your hands on a timely basis. It's the news magazine of grain-based foods — full of information that's crucial to executives and managers whose jobs demand thorough and accurate reporting. Everything critical to grain-based foods is covered — industry news and analysis, ingredient markets and in-depth feature articles focusing on the issues and events important to grain-based foods.

MEAT&POULTRY provides the trends, issues and technologies that effect the North American meat, poultry and seafood industry. Our editors tackle government regulations, labor relations, food safety and quality control. Everyone from processors and further processors to wholesalers, distributors, fresh meat packers, pet food manufacturers, and meat, poultry and seafood buyers will find MEAT&POULTRY an invaluable source.

Each issue of **World Grain** offers informative operation features for grain handling, flour milling and feed processing, as well as industry news, relevant special reports, commodity market updates, new product technology and in-depth looks at industry activities around the globe.

Real Blueberries

Functional, Flavorful, Fantastic!

Last year was another great year for blueberries in the food processing industry with over 1400 blueberry products entering the North American market. Research shows a 36% increase in the number of new blueberry products between 2009 and 2010.

Growth Industry

With new acres, farming and processing efficiencies, the production of North American highbush blueberries in 2010 was 477 million lb., up from 450 million lb. in 2009. North American production has increased almost seven fold over the past 40 years.

Formula Ready

Flavorful blueberries provide real blueberry product development opportunities. Select from a range of formats, such as fresh, frozen, canned, low moisture, and dehydrated, including dried, freeze dried, powdered, and preserved. Frozen blueberries comprise IQF, case frozen, and straight pack; liquid includes purées, concentrates, and juices. Real blueberries add value to most any product.

Consumer Friendly

Consumers like the taste of blueberries and prefer real blueberries over artificial. Consumers identify blueberries with health benefits such as antioxidants and fiber. They will pay more for products containing real blueberries. In key-person interviews 88.8% of consumers are willing to pay up to 50 cents more for products with real blueberries. Focus group respondents would pay 15 to 25% more for products with real blueberries. (Source: Hebert Research, 2008.) New health research should continue to drive demand.

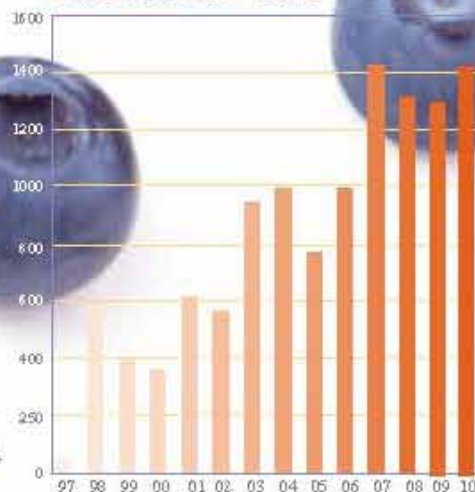

Real Blueberry Seal™

Real blueberries provide product authenticity, luscious color and real fruit benefits. The Real Blueberry Seal™ signifies authenticity, credibility, integrity; consumers see at a glance that your product uses real blueberries. The seal is available free of charge to qualified companies who utilize highbush blueberries in their products. Help consumers recognize that your product contains real blueberries. Show your blueberries!

The Company

With the introduction of Nutri-Snax™, Cereal Ingredients, Inc. is pleased to announce another innovative and patented product line addition to its growing Nutri-Bites® family of healthy foods. Nutri-Snax are delicious, nutritionally dense products that provide a good source of protein or the goodness of whole grain, plus the functionality of fiber.

Product

A crunchy, extruded one ounce serving of the soy based Nutri-Snax provides 7 grams of soy protein plus a 4.25 gram combination of 2 essential fibers that help promote health and wellness through increased digestive health. One ounce of the soy based Nutri-Snax provides enough protein and fiber to make a good protein and fiber claim. A one ounce serving of the whole grain based Nutri-Snax has 5.3 grams of the two fibers. The combination of a soluble prebiotic fiber and an insoluble fiber has been clinically proven to increase growth of the beneficial bacteria in the digestive tract. Nutri-Snax also aids in calcium absorption and promotes laxation.

Applications

- A one ounce, 100 calorie single serving of Nutri-Snax provides serious nutrition for active adults or a school lunch snack.
- A healthy alternative to fast digesting, high carbohydrate snacks.
- As a RTE cereal inclusion or as a RTE cereal by itself.
- For nutritional and cereal bars

Delicious made possible with SupHerb Fusions™

SupHerb Fusions are blends of fresh frozen culinary herbs and specialty vegetables that deliver “fusions” of flavor. Versatile and customizable, they are great for expanding your product offerings and streamlining production. Start with any of our SupHerb Fusions’ blends, pastes or purées – or create your own custom blend. We can work with you to achieve the flavor you have in mind.

To learn more about SupHerb Fusions email us at culinaryteam@supherbfarms.com.

WHY JOIN THE CHICAGO SECTION INSTITUTE OF FOOD TECHNOLOGISTS?

The Institute of Food Technologists is a unique umbrella organization, incorporating all diverse disciplines of food technology. Its members include:

- Food technologists and scientists
- Engineers
- R&D and quality control and assurance managers
- Sales and marketing executives
- Government regulators
- Educators
- Individuals in all food-related fields

Chicago Section IFT is the largest regional section. Its activities include:

- Regular technical meetings focusing on a broad spectrum of food technology topics
- Educational courses and symposia
- Opportunities for professional and personal development

Chicago Section IFT offers a variety of activities to broaden professional skills and to enhance relationships within the food industry. Chicago IFT offers many volunteer opportunities, including:

- Student affairs and scholarship
- Newsletter
- Employment
- World Wide Web Site
- Holiday party
- Hospitality/House
- Membership
- Program
- Summer activities
- Suppliers' Night
- Symposia
- Tanner Lecture

Meeting and working with peers helps professional development and offers personal satisfaction.

The IFT employment referral service helps members to research and secure positions within the food industry. The services offered include:

- Maintenance of resumes for inspection by employers
- Inspection of both local and national "Available Positions" lists
- Publication of "Positions Available" and "Situations Wanted" in the monthly newsletter

Become a member of the Chicago Section of the Institute of Food Technologists. Simply complete the application below, or on our website at
